To Whom It May Concern

### *Monitor Cost Recovery System*

This firm purchased the above system in August 1997. The system enables us to track, recover and export the amount to be charged to each client directly into our accounting package.

We use the system to capture our photocopy, facsimile and courier charges. The ability to enable these entries to be downloaded directly into our accounting package is of considerable time saving advantage as it means these entries do not have to be manually keyed into the accounting package and as a file number has to be entered before copies are made the recovery rate is increased.

We have found Monitor Business Machines very professional in every aspect of our dealings with them and their level of services and prompt response time has been excellent.

We have no hesitation in recommending their system.

Yours faithfully  
**FRIEDMAN LURIE SINGH**
